Subject: Cost Optimisation Opportunity – Recap from Bytes Session and Internal discussions with Peter Drnovsek 8th Aug 2025

Hi Peter,

I trust you are keeping well.

As discussed, find the attached. I uploaded this on confluence, but the attached files may render differently. So, resending via email.

Note: all appendages have been uploaded to Kaizen Reporting cloud on my share.

[Cost Optimisation Opportunity – Recap from Bytes Session and Internal discussions with Peter Drnovsek 8th Aug 2025 - Technology - Confluence](#)

Cost Optimisation Opportunity – Recap from Bytes Session and Internal discussions with Peter 8th Aug 2025

Service	Resources links	Comments
Unattached EBS volumes	https://apps.cloudhealthtech.com/pulse/health-check	Optimisation Opportunity – 9 Unattached EBS Volumes Identified Unattached EBS volumes incur ongoing charges despite not being in use. Recommend reviewing and deleting volumes no longer needed. This could deliver estimated savings of \$18–\$90 per month , depending on volume type and size.
S3 cloudhealth cost and usage report	https://apps.cloudhealthtech.com/ui/rightsizing/s3/dashboard/	Storage Optimisation Opportunity – 11 TB in cost-and-usage-reports-22697 (Kaizen Master -Account) Identifying and offloading or deleting aged data could save \$300+ per month . However, broader optimisation should align with Kaizen's <i>business priorities and regulatory obligations</i> across all storage tiers.
Opensearch	AWS Account JC Temp Sandbox	Optimisation Opportunity – OpenSearch OpenSearch incurs a minimum cost of ~\$28/month per domain . Recommend reviewing and decommissioning

		unused or underutilised domains, and right-sizing resources to reduce ongoing spend.
DynamoDB tables	https://apps.cloudhealthtech.com/ui/rightsizing/dynamodb/dashboard/	Optimisation Opportunity – 276 DynamoDB Tables Identified Recommend decommissioning tables with no activity over a defined period. As a first step, prioritise tables in accounts outside Kaizen's deployment strategy. Overall, this could deliver estimated savings of dependent on RCU WCU and storage configurations and while also reducing operational overhead and resource sprawl.
Unattached EIPs	https://apps.cloudhealthtech.com/policies/9689446221318/violation_report	Optimisation Opportunity – Unattached Elastic Ips 19 Unattached Elastic IPs incur ongoing charges (~\$3.60/month each) without providing value. Recommend identifying and releasing unused EIPs to eliminate unnecessary costs and reduce resource sprawl.
